EDUCATION

- M.S. Human-Computer Interaction + Design**, University of Washington — GPA 3.88 Aug 2026
- B.S. Information Sciences**, University of Tennessee Knoxville — GPA 3.74 May 2025

EXPERIENCE

UX Design Consultant (Contract), Autotroph Games May 2026 – Present

- Designing for **Haunted Heist**, an indie horror title with **50,000+ Steam wishlists** ahead of its October 2026 launch.
- Owned the game's full information architecture for the settings menu across four tabs — video, audio, game, and controls.
- Rebuilt the pre-match lobby with the studio's internal designer, reorganizing a dense screen where poorly placed buttons were causing frequent misclicks.
- Currently leading design of the leaderboard and rewards systems.

Product Designer, Optimizely (Sponsored Capstone) Feb 2026 – Aug 2026

- Designed the campaign picker, a feature that ranks marketing campaigns by which ones the customer's existing data can actually support, so teams start where they will see results.
- Led synthesis across 11 semi-structured interviews with Optimizely subject matter experts and external marketers, conducting 4 of them.
- Evaluated three architectural options for where the personalization workflow should live and made the case for the direction the team built.
- Set the metrics and layout for the results page, and handed engineering a prototype plus a PRD tracing every screen back to its research.

UX Design Intern, Element 47 Jun 2024 – Aug 2024

- Designed two client websites from wireframes through final layouts: Bottle Cap, a Nashville pub, and Martha O'Bryan, a nonprofit.
- Ran competitive research to guide feature decisions, translating findings into personas the marketing team used in client work.
- Standardized navigation and layout inconsistencies across existing client sites.

LEADERSHIP

VALORANT Esports Team, University of Tennessee Jun 2021 – May 2025

- Built and led a summer bootcamp for 20+ players, designing and running instructional sessions on strategy, mechanics, and team coordination.
- Placed 1st in the Southern Esports Conference LUNA tournament.
- Competed in professional esports organization, Version1, women's tournament.

SKILLS

Tools: Figma, Claude Code, Cursor, Miro, Qualtrics, Adobe Creative Studio, Balsamiq, Mobbin

Methods: User interviews, usability testing, competitive research, wireframing, high-fidelity prototyping, design documentation and PRDs, information architecture, journey mapping, A/B testing, heuristic evaluation
